SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)
Department of Computer Science & Engineering
ASSESSMENT TOOL 1– CONCEPT MAPPING

CourseCode	**CSA0315**	**CourseTitle**	**Data Structures**
COAssessed	**CO1**	**Assessment**	**Assessment Tool1:Concept Mapping**
Weightage	**35% of CIA**	**TotalMarks**	**100**
CO1 Statement	***Apply suitable data structures and ADTs for efficient problem solving by analyzing time and space complexity.* (BL2,BL3)**		
Student Name	**R. Kishan Raghava**	**Reg.No.**	**192525154**
Section/Batch	**Slot D / 2025**	**Date**	**03-10-2026**

Code of Conduct:

I, R Kishan Raghava(19252514), certify that this submission is my original work and that I have adheredtotheguidelinesspecifiedforthisassessment.Iunderstandthatanyviolationofacademicintegrity rules will result in disciplinary action.

Signature of the student:

R.Kishan

Criteria	Weightage	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)	Marks
Concept Identification	25%	Identifies all key concepts from literature accurately and comprehensively	Identifies most key concepts with minor omissions	Identifies limited concepts; some are irrelevant or missing	Fails to identify essential concepts	
Linkages	25%	Establishes clear, meaningful, and accurate relationships between concepts	Shows correct relationships with minor gaps	Relationships are weak, unclear, or partially incorrect	No meaningful relationships established	
Organization	20%	Concepts are well-structured hierarchically with logical flow and grouping	Mostly organized with minor structural issues	Some organization but lacks clear hierarchy	No logical organization or structure	
Integration of Literature	20%	Integrates multiple studies effectively to show connections and comparisons	Shows some integration of literature	Limited integration; mostly isolated concepts	No integration of literature evidence	
Clarity	10%	Concept map is clear, neat, visually structured, and easy to interpret	Generally clear with minor readability issues	Clarity is reduced; difficult to interpret in parts	Poorly presented and hard to understand	

Q29. A sorting system uses recursive algorithms to process data. Construct a concept map linking Recursion → Divide and Conquer → Sub problems → Call Stack → Time Complexity → Efficiency.

CONCEPT MAPPING
